Re: Conservation Chemical Company of Illinois, Inc. Site - Gary, IN  
General Notice of Liability

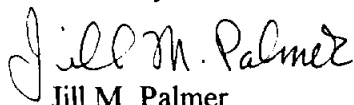

Dear Ms. Beasley:

A copy of EPA's General Notice of Liability letter, dated October 10, 1994, was recently provided to me in connection with the above-referenced Site. The letter was provided to me on behalf of the Advanced Circuitry Division ("ACD") of Litton Systems, Inc., one of the PRPs identified by EPA. Please be advised that the address to which the General Notice letter apparently was sent (490 L'Enfant Plaza, S.W., Washington, D.C.) is incorrect as Litton has not been at that address for almost 4 years. The fact that the letter was not forwarded to ACD or to Litton explains why a response was not submitted to EPA.

Notwithstanding the foregoing, as requested by EPA, ACD is willing, to the extent of its involvement at the Site, to participate in the performance or financing of activities described in EPA's letter. So that ACD can better understand its alleged involvement at the Site, we request copies of any information in EPA's files linking ACD to the Site. ACD further requests a copy of any information circulated at the November 10, 1994 kick-off meeting. All such information should be submitted to me at the address inscribed above. We look forward to receiving the requested information.

Please do not hesitate to call me with any questions.

Sincerely,

Jill M. Palmer  
Environmental Affairs Counsel
